

Lithuanian RES support: New Auction System

National Energy Strategy

2025

2030

- Double (to 5TWh) electricity generation from RES

- 70% of generation from local sources
- 45% RES energy targets

Features of new support system

- Technology neutrality, all capacities
- All RES producers compete for 300 GWh quota
- Only new installations
- Competitive support allocation – auctions
- 12 years support
- Market premium
- Winning criteria – lowest offered premium
- Ceiling price

Main conditions

- Balancing responsibility for producer (for > 500kW)
- Connection costs covered by producers
- Selling into market or bilateral agreements – no mandatory purchase
- Security of discharge of obligation fee
- Fixed amount of supported energy – fine for no delivery

The first auction under new rules planned on 2 Sept 2019

Based on information from Ministry of Energy
